

Pretalc B 50

Highly efficient odour scavenger for dosage into various plastics polymers during injection moulding or extrusion processes.

Pretalc B 50 is a highly efficient odour scavenger based on a zeolithe mineral composition. It is dosed for standard at 2,5-3 % only. The maximum recommended dosage is at 5 %.

CARRIER POLYMER	LLDPE
FILLER CONTENT	50 %
PHYSICAL PROPERTIES	density 1310 kg/m ³ Bulk density ca. 1000 kg/m ³
PACKAGING	in 25 kg bags at 1.250 kg per pallet
